## SKILLS

|                         |                                                                               |
|-------------------------|-------------------------------------------------------------------------------|
| <b>Languages:</b>       | C++, JavaScript, Java, Python, PHP                                            |
| <b>Frameworks:</b>      | Node.js, React.js, Express.js, Tailwind CSS, Redux Toolkit                    |
| <b>Tools/Platforms:</b> | Postman, Git, GitHub, MySQL, MongoDB, Cloudinary, Razorpay                    |
| <b>Soft Skills:</b>     | Problem-Solving, Team Collaboration, Adaptability, Communication              |
| <b>Core Subjects:</b>   | Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                   |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Zenzloom</b>   Node.js, Express.js, MongoDB, React.js   <a href="#">LIVE</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Dec' 25 - Jan' 26 |
| <ul style="list-style-type: none"><li>Engineered a production-deployed MERN e-commerce platform with Redux Toolkit for global state management, full admin and user dashboards, and Cloudinary-hosted product image pipeline — ensuring fast media delivery without server storage overhead.</li><li>Architected JWT + bcrypt authentication with 15+ RESTful API endpoints, input validation middleware, and role-based route protection; integrated Razorpay payment gateway (test-mode), successfully simulating ₹10,000+ in transactions across the full checkout flow.</li><li>Implemented an AI-powered chatbot using Llama via OpenRouter API to handle real-time user queries, reducing manual support dependency; deployed on Render + Vercel with optimized static routing for seamless frontend-backend delivery.</li></ul> |                   |
| <b>Plant-Hub</b>   PHP, SQL, Responsive Website   <a href="#">LIVE</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Mar' 25 - May 25  |
| <ul style="list-style-type: none"><li>Built and deployed a full-stack plant e-commerce portal using PHP + MySQL with server-side rendering, covering user authentication, shopping cart, order management, and automated email notifications across a catalog of 20+ plant species listings.</li><li>Integrated Razorpay (test-mode) simulating ₹10,000+ in transactions, and introduced a COD (Cash on Delivery) option to reduce unnecessary API calls — improving page response time and lowering payment gateway dependency for users preferring offline payment.</li><li>Structured the codebase with strict MVC architecture and a normalized MySQL schema across models, controllers, and views — ensuring clean CRUD operations, maintainable relational data design, and a fully functional live prototype.</li></ul>         |                   |

## SUMMER TRAINING

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                   |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|

| <ul style="list-style-type: none"><li>Completed a certified summer training program in Data Structures and Algorithms (DSA).</li><li>Gained hands-on experience with arrays, linked lists, stacks, queues, trees, graphs, sorting algorithms, and recursion — directly applicable to SDE technical interview rounds.</li><li>Solved 50+ coding exercises in C++/Java, strengthening algorithmic thinking and pattern recognition for competitive programming and technical assessments.</li></ul> |                   |

## CERTIFICATES

|                                                                  |         |
|------------------------------------------------------------------|---------|
| ReactJS   <a href="#">Springboard</a>                            | Apr' 26 |
| Bits and Bytes of Computer Networking   <a href="#">Coursera</a> | Sep' 25 |
| C Programming   <a href="#">CSEpathshala</a>                     | Mar' 24 |
| Responsive Web Design   <a href="#">freeCodeCamp</a>             | Nov' 23 |

## Achievements

Attained Gold level in Java on **HackerRank**, validating strong object-oriented programming and core Java expertise on a globally recognized platform.

Solved 100+ problems and algorithmic challenges spanning arrays, strings, hashmaps, linked lists, stacks, binary trees, graphs consistently reinforcing DSA proficiency across different platform like **HackerRank**, **Leetcode**, **GFG**, **Codeforces**.
